

In general, Amateur Radio operators are welcome to day use these Parks Canada sites. Some suggestions include parking in designated areas, operate from your vehicle, bring your own table and chair where there may not be a picnic table, use battery power, bring your own antenna which may be on a tripod or strung in the trees, proudly wear your NPARC member id, be safety conscious and use safety traffic cones to demarcate your operating area and mark your feedlines with caution flags. Note that popup sun shades are considered to be tents and as such are not permitted unless a permit, if at all, in the order of \$2,000 per day is obtained.

John, VA3WM has agreed to keep his Parks Canada contact informed of any NPARC member planning to activate at one or more of the Niagara Region Parks Canada sites. As such, please send me an email, repeaterchair@nparc.on.ca / va3wm@outlook.com with the dates and sites on which you are planning to activate.
